

# KB1029 How to enable widescreen patch

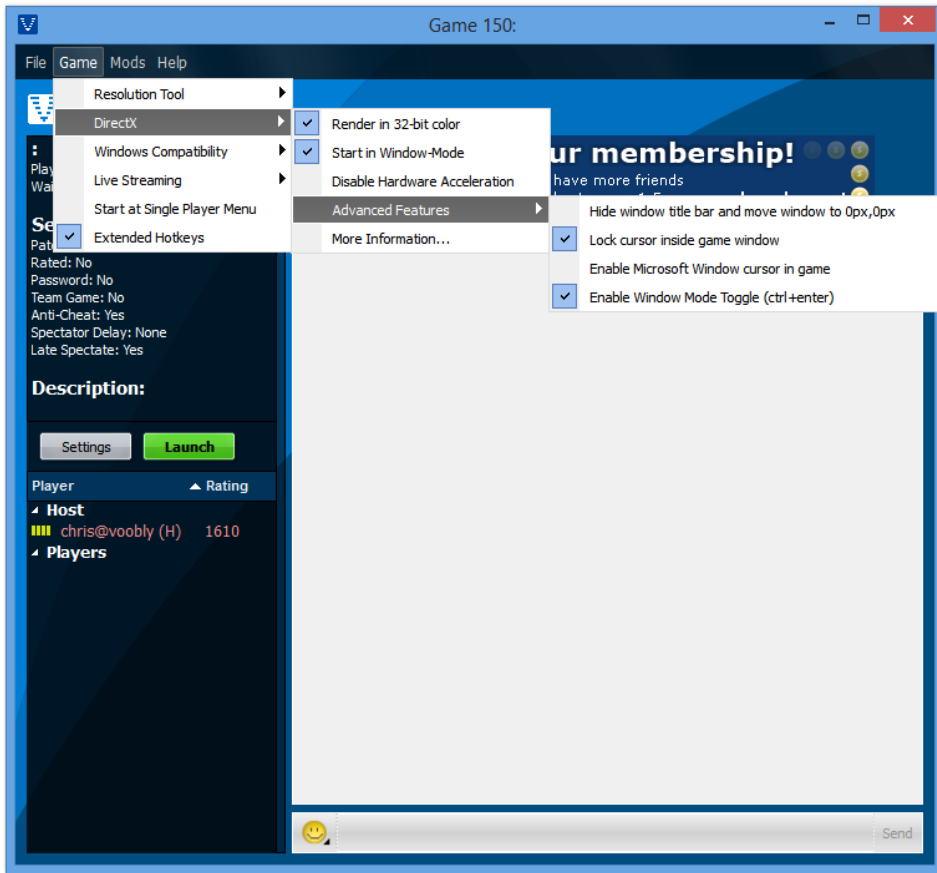

Widescreen is already integrated into Voobly and is also enabled by default. If you installed any widescreen patches, please uninstall and perform a clean installation of the Voobly client.

## Step-by-Step guide

1. Join a game lobby and host a game.
2. In the **game menu** at top, select **Resolution Tool** and check **Force Desktop Resolution In Game**. Also check **UP Style** in **game menu > Resolution Tool > Command Bar Position**.

3. We also recommend enabling the following options for better game experience:
  - a. **Render in 32-bit color** in menu Game > DirectX
  - b. **Start in Windows-Mode** in menu Game > DirectX
  - c. **Enable Window Mode Toggle** (ctrl+enter) in menu Game > DirectX > Advanced Features
